This Week's Highlights:

This week campers explored some themes of space science and rocketry and built their own rockets. Our Wednesday and Friday launches were exciting for all our campers. The Fourth of July carnival was a blast!

Looking Ahead:

Week 4: The Third Dimension

Campers will spend the week learning the ins and outs of the 3D printing process, from visualization, to design, digital modeling, and actual printing. Using 3D design software and a 3D printer, campers sketch, design, print and create a personalized candy mold.

Staff Spotlight:

This week we will meet the Orange Iguanas instructional team: Sarah, Jenna, and A'Blesyn!

Hi everyone! My name is Sarah, and I am excited to be returning to Cranbrook STEM Camp for my third year as an instructor! During the school year I work with ASD students at Royal Oak Schools, and I am a full-time college student. My interests range from a variety of science fields, with biology being my favorite. I am looking forward to spending the summer with all of your children here at camp!

Hi, I'm Jenna! I currently attend the University of Michigan and I'm studying psychology! I absolutely fell in love with the STEM field in early elementary school. I enjoy shopping, going out with my friends, movie nights, and exploring new places.

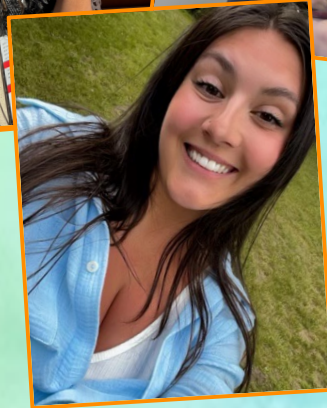

Hey! I'm A'Blesyn (AB)! I will be going into my second year of college at Wayne State University, studying film. Although I'm studying film, I have many other interests like fashion, crocheting, thrifting, etc. I love trying new things as well, which is why I'm super excited to be a camp counselor!
