Week # 8 Spectacular Scientists

Purple Parrots
Isabella M.

Orange Iguanas
Benjamin L.

Blue Barracudas
Luke O.

Green Monkeys
Simon S.

Red Jaguars
Viola H.

This Week's Highlights:

We dove into our last week of camp by exploring the world underwater and travelling to new depths in an underwater ROV that each team built and tested!

Thank you!

We have reached the end of another season of camp! The eight weeks have passed by quickly and have been full of games, fun, and of course, STEM activities. We'd like to acknowledge the campers who were with us for all eight weeks of 2024, and who received the special eight-week pin on the final Friday: Leia B., Freda E., Burton G., Viola H., Elina K., Aiden Z., and Zachary Z.! It was wonderful to see your smiling faces every day this summer!

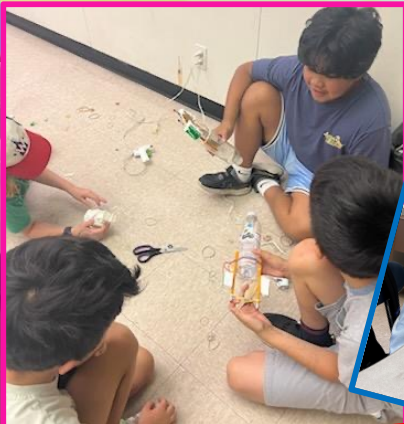

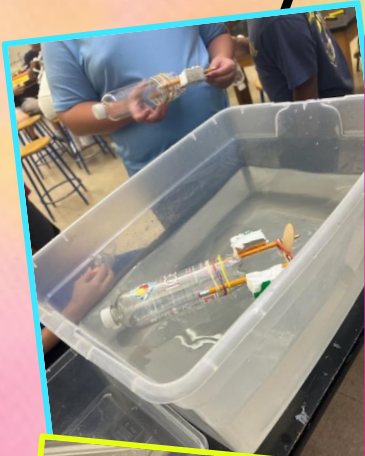

We'd also like to thank all the parents who gave us the privilege of working with your children this summer. We appreciated your kindness and encouragement at drop-off and pick-up and are glad we were able to be part of this summer's memories for your kids.

Special gratitude goes out to our instructors and counselors who did an outstanding job once again this year: Trent, Margot, Ashley, Amber, Aisha, Kendall, Suzanne, Lauren, Sarah, Jenna, A'Blesyn, Lizzie, and Miles! Thanks so much for all your hard work. Your enthusiasm for the kids and for STEM made our camp awesome.

It won't be long before we start planning for STEM Camp 2025. We have new STEM content coming in summer 2025, check the website this fall for details! Have a great year and see you next summer!
